

Installation Guidelines

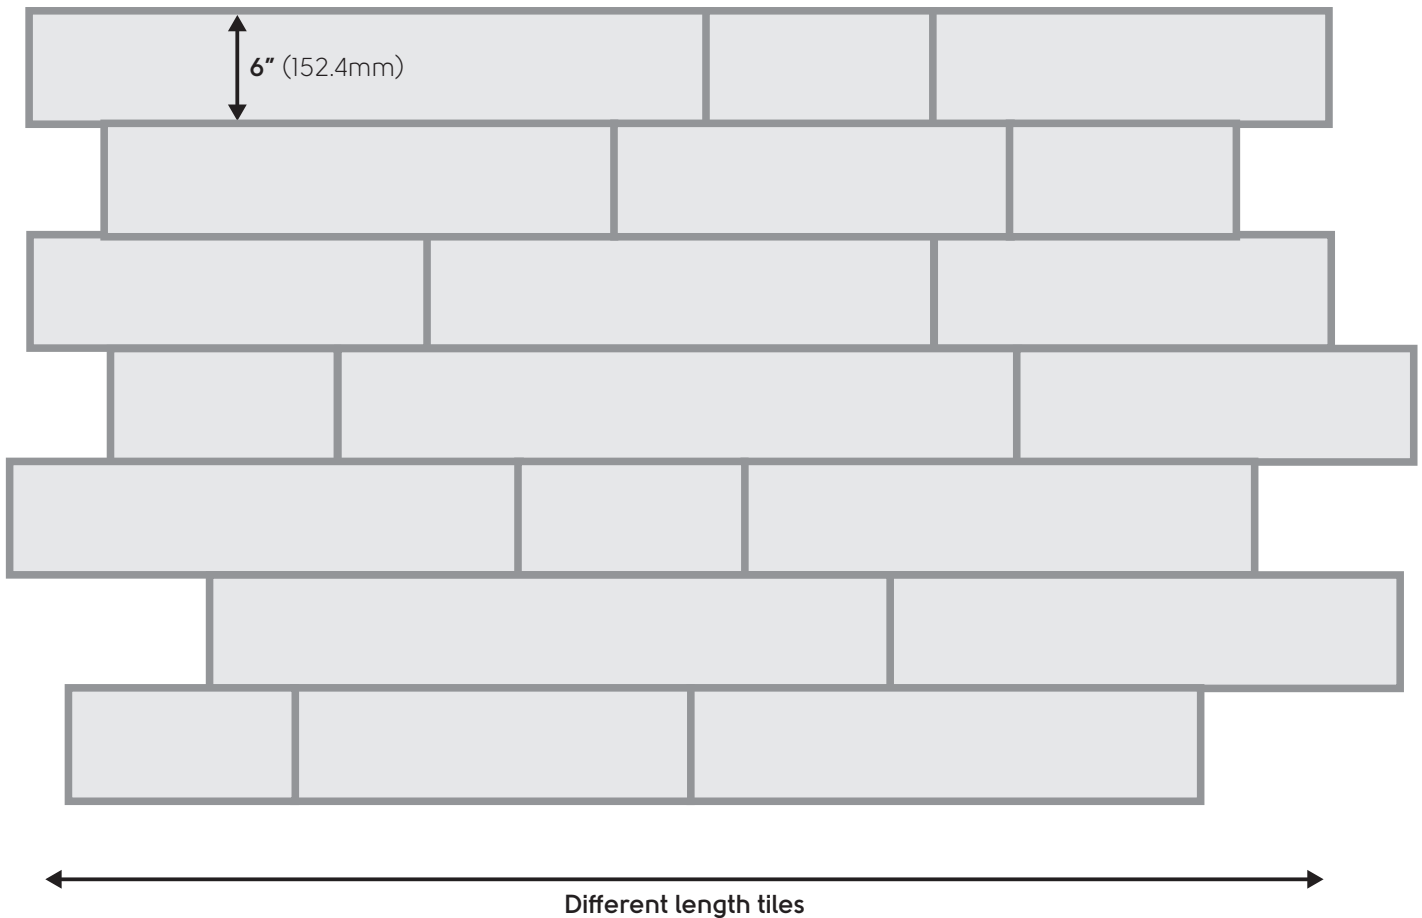

FreeLength Stone

Art Select

Each box of 3.34m² (36sq.ft.) contains 36 tiles, all 6" (152.4mm) wide, in the following quantities.

FreeLength products have a single width, 6" (152.4mm) and differing lengths. When installed with a staggered joint (see diagram below), this will give a more random pattern effect on the floor.

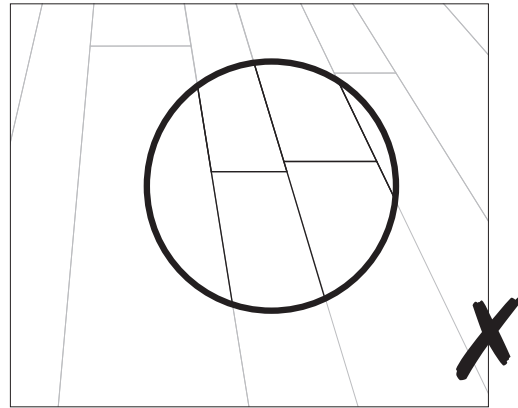

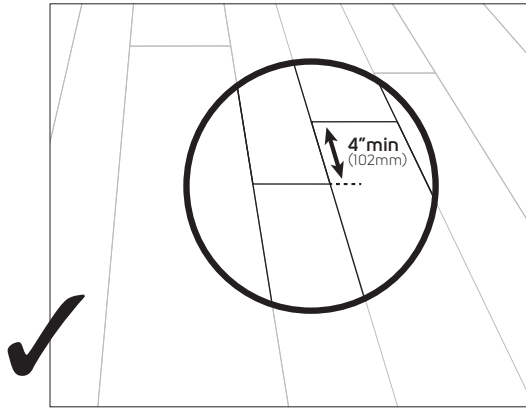

(Please see over for our installation tips)

Please follow the tips below to help you achieve a random pattern effect on your floor.

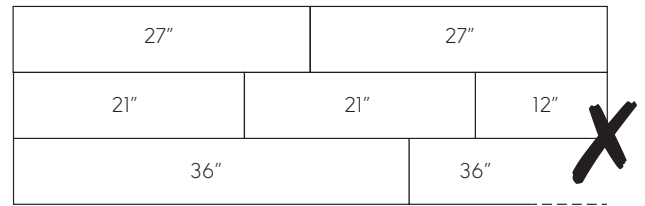

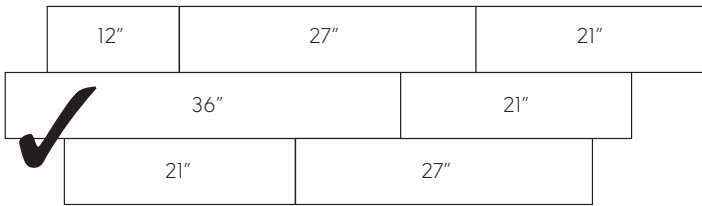

Tip 1

Joints should be a minimum of 4" (102 mm) apart.

Tip 2

Always lay different sizes next to each other, do not fit all long lengths or all short lengths together. This could lead to fitting issues at the end of the installation.

Tip 3

Install using one box at a time to ensure all sizes are used up.
