PRODUCTS

↑ JAMES LATHAM

Shinnoki 2.0 is a range of ready to use, high quality veneered panels that are supplied already stained and lacquered, requiring no further finishing. One key aspect of Shinnoki 2.0 is its stability. The veneers are mismatched, but stained and textured to create a consistent finish that shows the natural aspects and beauty of the

species. The extensive Shinnoki 2.0 portfolio is supplied in designs which are completely in tune with current design trends and includes matching realwood and ABS edge banding. The 17 designs are also supplied in separate 3-ply veneer sheets, perfect for curved surfaces, doors or other interior requirements. lathamtimber.co.uk

↑ RED SOURCE

Flavours of Mediterranean hideaways, of large English gardens, warm atmosphere for what is really a highly contemporary, technologically advanced armchair: Metalmobil's Flint with the combination of its parts, the steel back and frame, and polypropylene seat are produced using a fine-tuned assembly system. Chrome, burnished chrome and brass finishes are now available with a wood or upholstered seat, giving the Flint armchair an all-round classy precious indoor/outdoor feel. Metalmobil - An Italian story of quality and design at Red Source Interiors's online specialist resource for choosing, specifying and buying quality affordable branded furnishings easily with your pc, tablet or smart phone. contractfurniturestore.co.uk

← KARNDÉAN DESIGNFLOORING

The UK's market leader in luxury vinyl flooring Karndean Designflooring previewed its exclusive new Kaleidoscope collection at Clerkenwell Design Week 2016. Designed to offer unparalleled flexibility, Kaleidoscope features six designs as standard including Cubix, Pennon and Apex. It contains popular shapes and patterns, such as hexagons,

chevrons and cubes, to name but a few, that can be cut in a number of colour combinations across Karndean's established wood and stone designs. Kaleidoscope also introduces block colourways, giving designers the ability to specify bright colours against wood and stone for added visual interest in commercial and residential spaces. karndean.com
