# Wood

Our popular Van Gogh collection captures the look and feel of real timber in a variety of colours and designs from traditional rustic to cool contemporary. Large planks, distinctive grain details and a subtle texture creates a style that works in both residential and commercial environments.

## The Van Gogh collection offers:

- Beautifully authentic wood effects
- Subtle textures
- New Australian woods

The colour range in the Van Gogh collection offers a broad variety. From the pale tones of Blush Oak to the striking dark tones of Ebony, it adds style to any space.

Misty Grey Oak VGW112T © | SCB-VGW112T ©

Herringbone can only be used in gluedown format.

# The design you want in the format you need

We know that choosing a floor that suits you and your home can be challenging... That's why we offer many of our beautiful designs in dual format. As these are available in both gluedown or rigid core, you can enjoy the design you want, in the format you need.

## Gluedown

With our gluedown ranges you have complete control over the look of your floor, from the lay pattern to the incorporation of our design strips and borders.

Individually replaceable

Design capabilities

No expansion gap required

Individual, glued down planks and tiles

## Rigid core

Our rigid core hybrid ranges feature a click-locking system that allows them to be installed over most existing hard floors, without the need for adhesive.

Click-locking mechanism

Reduces noise transfer

Quick and easy to install

Installs over most existing hard floors

# Choose your format

## Gluedown

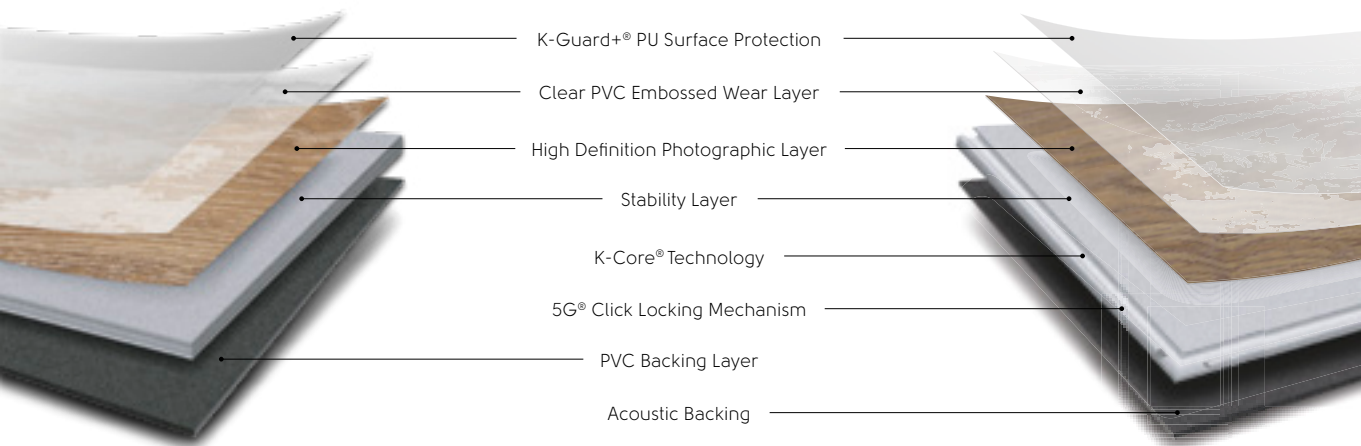

### Why choose a gluedown floor?

- **No expansion gap required:** Can be fitted hard up against walls and fixtures with no need for accessories to cover the gap.
- **Personalisation:** With our gluedown ranges, you have complete control over the look of your floor, from the lay pattern to the incorporation of our design strips and borders.\*
- **Glued down:** Planks and tiles are permanently secured with Mega Bond glue to the subfloor.

## Rigid core

### Why choose a rigid core floor?

- **Installs over existing hard floors:** Rigid core can be installed over most existing hard floor coverings.
- **Acoustic qualities:** The premium, pre-attached acoustic foam backing reduces noise transfer to rooms below, making it perfect for upstairs bedrooms, playrooms or attic/loft conversions.
- **Quick and easy to install:** Click-locking systems allow the installer to quickly drop and lock planks together, meaning less upheaval and disruption to everyday life.

*Interior trends*

# *Home as a sanctuary*

## Redefining the way we live

Over recent years, the disruption of the global pandemic has only added to a growing sensory overload of modern living. In response, we see that people are seeking a life that's more authentic, simpler and closer to nature. At Karndean Designflooring we set out to understand what that means in design trends. While we identified four clear and different directions in interior styling, they share a common heart: the home as a sanctuary.

When the world stayed at home, it made us rethink our 'four walls'. 'Home' has always been our private retreat from the world, but now more than ever it has become our sanctuary - a place of personal comfort, nurturing and cocooning. For many, home also became a place for working, for homeschooling and the place where we found our entertainment and explored new interests. This multi-purposing of our living spaces is another key driver of the emerging design trends that deliver practical and versatile functionality while never compromising on comfort or style.

Focus on style

# Smooth Operator

Pared-back palettes layer mono-colour shades and therapeutic tones over clean interior lines.

While drawing heavily on a retro aesthetic, Smooth Operator is as fresh as tomorrow. It perfectly balances the current yearning for newness with the reassurance of the familiar.

Classical touches such as arches and bespoke built-in furniture set a luxurious scene. Monumental materials like stone and concrete are made soft, and timber becomes fluid as sinuous, sensual curves deliver both visual and physical comfort and reassurance.

Distressed Oak  
VGW82T | SCB-VGW82T

Classic Oak VGW86T | SCB-VGW86T

Focus on style

With no compromise to comfort or style, Timeworn celebrates the imperfections and imperfect character of natural materials.

Timeworn Treasures is an antidote to the fast pace and overstimulation of modern life along with its ever-changing fashions and endless consumer choices. Think raw-edged timbers and the organic textures of stone. Luxurious leathers and cosy lighting. And the reassuring artisan's touch of handcrafted furniture, fabrics, ceramics and art.

Classic Oak VGW86T | SCB-VGW86T

Focus on style

# Firm Foundations

Firm Foundations combines the strength and resilience of nature with a raw-edged and utilitarian industrial vibe.

Firm Foundations is a timeless design direction that delivers just that. While this look is all about dependable function and practicality, it's also uncompromising in bringing understated elegance and comfort to contemporary living spaces.

Think dark timbers, exposed brick, polished concrete and terrazzo. Think modern statement furniture and a moody dark palette with bursts of colour that provide a backdrop for optimism and a comfortable life of luxury.

Focus on style

Golden Age

In a time of change and uncertainty, the Golden Age palette taps into the comfort of the familiar. Organic colours of the earth, timbers and natural fibres bring the grounding and nourishing power of nature into the home

The Golden Age is all about interiors that spark joy and a closer connection to nature. As we reconnect to the things that matter most, an organic palette, materials inspired by nature, and the artisan's hand in furniture and furnishings come together in wholesome, energising and artful interiors. Bring a comforting glow to interior spaces all year round.

Natural Maple VGW127T | SCB-VGW127T

*Our inspiration*

# Where we sourced our inspiration

## Spotted Gum

The Spotted Gum tree flourishes in coastal areas along the eastern seaboard of Australia, ranging from the mountains of the Great Dividing Range to the sunshine coast of Queensland. Large amounts of sapwood can be seen within the boards and this adds to the blend of features that make the product so distinctive. Even when coloured, the sap creates a tonal plank that will work in all interiors.

## Oak

These boards were hand selected as a trusted raw material and canvas to work with. The objective was to create an even, non-tonal visual across the floor, while retaining the much-loved characteristics of the natural, prime timber. The light speckling seen within the tight grains occurs due to the rapid dehydration of the boards once felled. We then hand applied coloured oils to produce on-trend colours.

## Elm

Elm trees are native primarily to north temperate areas and has been admired for centuries for their height and lush foliage. Elm wood has long been used in the construction of furniture, boats and buildings because of its natural durability. Known for its exquisite grain pattern and light to medium reddish-brown and sapwood, its grain is smooth and features a finely waved pattern.

## Maple

Widely distributed in the northern hemisphere and heavily concentrated in China. Maples are one of the most popular ornamental trees for planting along streets and in parks due to their unique beauty with many displaying striking autumn colour changes. In its natural form, Maple wood is attractively creamy and warm with a pinkish tinge. The timber is fine-textured and generally straight-grained appearance.

## Birch

Birch is right at home across the cooler parts of North America, Europe and Asia. Well known for their smooth, light grey-white bark which usually peels horizontally in thin sheets, especially on younger trees. Birch wood has good strength properties, is flexible and tough but not particularly hard, making the wood easy to work with. The natural wood has a yellow-white colouring and a gentle wavy grain.

## Sycamore

European Sycamore belongs to the acer family, along with maple, and features many of the same characteristics. The most striking feature of the tree is the bark pattern comprised of warm-grey outer bark that peels off in large patches to reveal the wood within. The wood has a fine, close texture and in its natural form tends to be a light, almost white colour, making it an ideal colour carrier.

## Blackbutt

A quintessential Australian hardwood that takes its name from the lower half of the tree's trunk which is blackened by the fierce forest fires that both destroy, and then renew. These boards were sourced from the very north of New South Wales where thick forests merge with the beautiful coastline. Great care was taken to retain the oozing sap lines that add to the distinctive linear grain and bleed into the timber.

# Environmental

## Karndean Designflooring and the environment

At Karndean Designflooring we find inspiration for our products in the beauty of the natural world and feel passionate about bringing this into every product we create. In order to keep our environment protected we do everything we can to continuously improve our manufacturing processes to ensure sustainability whilst delivering best value. We have always aimed to make stylish and durable floors with the lowest possible impact on the environment, and have never had to compromise quality or performance in order to comply with legislation or meet environmental requirements.

Karndean Designflooring is a member of the Green Building Councils of Australia and New Zealand and complies with their requirements under GreenStar. All Karndean products and accessories are manufactured in facilities certified to the ISO 14001 Environmental Management and ISO 9001 Quality Management International Standards. Our approach is based on the use of recycled materials in our floor coverings and ensuring that the finished product is suitable for recycling if required.

### What's more...

- All of our packaging is made using recycled material, which we continually review to ensure that it is environmentally friendly and fit for purpose
- We use individual logistical solutions to efficiently and effectively transport our products
- Our storage facilities use high density racking to maximise capacity and minimise impact
- Our offices are introducing innovative energy saving techniques
- We are members of the Green Building Council Australia (GBCA) and Green Building Council New Zealand (NZGBC)
- Our products qualify for eco-points towards GreenStar building projects
- All of our adhesives are water based, solvent-free, have low VOC emissions and are GreenTag certified

### GreenStar GreenTag™ certified

The majority of Karndean luxury vinyl ranges are fully certified to Global GreenTag, the third party multi-criteria, consensus based and externally verified Type 1 eco-labelling program. This is one of the largest product sustainability certification systems in Australasia and the only certification mark approved by the Australian Competition and Consumer Commission (ACCC).

GreenTag comprises two certification systems and the majority of Karndean Designflooring luxury vinyl is certified under both.

### The future

Our continued product innovation focuses on reducing our environmental impact and complying with environmental legislation and recognized certifications worldwide. Our aim is to remain the leading supplier of LVT flooring and to have a market-leading environmental record of achievement through the development of sustainable products and processes.

### LCARate™

Life Cycle Analysis is for all products and all rating tools that engage LCA with separate output called an Environmental Product Declaration (EPD), which is a summary LCA report used for certain credits in some rating tools for GreenStar.

### GreenRate™

GreenRate is a straight Type 1 eco label developed to meet the requirements of specific green building rating tools. It includes indoor environmental air quality: volatile organic compounds compliant (IEQ VOC) and reduced exposure to pollutants. GreenRate is offered in three levels of quality from Level 'C' up to Level 'A' relevant to GreenStar in Australia and New Zealand.

Karndean Designflooring LVT ranges and adhesives are fully certified under GreenStar GreenRate Level 'A', plus under international FloorScore Indoor Air Quality Certification for low emitting VOC's. Also certified to LCARate "silver streamline".

#### Imagery and Design Reproduction

Photography and print cannot always produce a perfect representation of our products. This includes colour, pattern variation and installation elements used. For this reason we strongly recommend obtaining a product sample and where possible viewing a larger sample in-store. We also recommend visiting our website for information on installation, after care and product selection: [www.karndean.com/advice](http://www.karndean.com/advice). We love developing new ideas and improving on our existing designs which means that sometimes products are withdrawn at short notice. We hate to disappoint and will work with you to find an alternative design. Please contact Customer Service for more information.
