Cleaning and maintaining your Karndean floor

Karndean Designflooring is durable and easy to look after. Our K-Guard+ enhanced surface treatment helps protect against everyday wear, spills and scuffs. This makes it easier and more environmentally friendly to clean and maintain, giving you peace of mind that your Karndean floor will look great for years to come.

We have a dedicated section on the website (www.karndean.com/cleaning) with videos which explain how best to look after your Karndean floor and covers frequently asked questions from our customers.

Regular cleaning with a pH neutral cleaner such as Karndean Clean will help keep your floor at its best. We also have our own Floor Care Kits that you can order from your local retailer.

Inside your Floor Care Kit

Over time you may want to treat your floor to some extra care. We recommend every six to twelve months, depending on wear, that you strip and refresh your floor using Karndean Remove and Karndean Refresh to further enhance its look and durability.

Color and Pattern Reproduction

We are careful to make sure our brochures are accurate and printed to very high standards, but photography and printing cannot always create a perfect representation of our products. For this reason we strongly recommend that you look at a sample of any product you are considering before placing your order.

All of our products are inspired by things we have seen in the natural world. Just as variation in color and detail is part of the unique beauty of natural materials, it is also a feature of many of our designs. This means that with some of our products you will see natural variation when your floor is laid. If in doubt, ask your retailer to show you a larger sample of the product.
